## Inspiring confidence

With over 35 years of experience, Flexicare supports clinicians worldwide to enhance patient outcomes with class leading devices.

### **VeoFlo® Pro**

#### **The comfortable choice for effective High Flow Oxygen Therapy**

New centrally located swivel design makes it easier to change the orientation so the tube can be comfortably placed on either side, adding more comfort to the patient and efficiencies to clinicians.

Designed to allow for a range of oxygen concentrations using variable flow rates at optimal conditions.

#### **+ Medium Concentration Masks**

Soft, feathered-edge rim for excellent fit and seal provide maximum comfort & efficacy.

#### **+ High Flow Nasal Cannulas**

Lightweight, flexible tubing with soft contoured nasal prongs, enhancing therapy compliance.

More than confident

# Certain

## Elekta Unity MR-Linac allows you to see and treat like never before

Anatomy-specific MR imaging and uncompromised design give you the platform to transform treatment, outcomes, and efficiency.

Our market-leading Comprehensive Motion Management capabilities deliver true dose optimization and allow you to adapt therapy for every patient and every fraction.

Deliver benefits of adaptive treatments from day one through comprehensive onboarding, dedicated support and a community of your peers.

Find out how Unity empowers you to treat with certainty

## + Accuracy is an Art

### Rembra RT

Computed tomography for radiation oncology

For clinicians who demand precision in managing respiratory motion, Rembra RT combines advanced CT simulation, innovative imaging technology, and streamlined workflows, empowering you to deliver the best possible patient outcomes.

Now enhanced with Philips Precise Image using AI to provide exceptional image quality at a significantly lower radiation dose.

Certainty Matters

CyberKnife® S7™

Radixact®

© 2026 Accuray Incorporated. All Rights Reserved.

Important Safety Information: Most side effects of radiotherapy, including radiotherapy delivered with Accuray systems, are mild and temporary, often involving fatigue, nausea, and skin irritation. Side effects can be severe, however, leading to pain, alterations in normal body functions (for example, urinary or salivary function), deterioration of quality of life, permanent injury, and even death. Side effects can occur during or shortly after radiation treatment or in the months and years following radiation. The nature and severity of side effects depend on many factors, including the size and location of the treated tumor, the treatment technique (for example, the radiation dose), and the patient's general medical condition, to name a few. For more details about the side effects of your radiation therapy, and to see if treatment with an Accuray product is right for you, ask your doctor.

\*\* Synchrony® technology is an optional upgrade available for purchase by hospitals.

# Internal Anatomy Verification During Breath Hold

The **ExacTrac Dynamic Deep Inspiration Breath Hold (DIBH)** workflow utilizes automated, tattoo-less pre-positioning coupled with internal anatomy verification at breath-hold level for precise dose tumor targeting with increased confidence in sparing critical organs.

SIM

#### 4D AND BREATH-HOLD CT

simrt™

Non-contact 4D and breath-hold CT with a simple workflow, no hardware setups and no surrogates.

PLAN

#### CLEARANCE MAPPING

maprt™

Clearance Mapping of entire patient and all equipment to assist planning without fear of collision, eliminating dry runs and replans.

TREAT

#### MOTION MANAGEMENT

alignrt™

Contactless pre-treatment patient ID. Rapid tattoo-free patient setup. TG302/ESTRO-ACROP compliant latency and accuracy at all couch / gantry angles and skin tones.

DOSE

#### DOSE VISUALIZATION

dosert™

Dose visualization to help stop dose delivery errors in real time.
